DAVID GARCÍA GONZÁLEZ

BACKEND DEVELOPER

After more than 5 years of experience as an IT technician, I decided to pursue my true passion, software development. I have focused my efforts on backend development, particularly with Java and Spring.

Now, I am seeking an opportunity in a dynamic company where I can apply and expand my skills, actively contributing to the team's growth and success, with the intention of establishing a long-term working relationship.

EXPERIENCE

IT Technician at GXO

+5 years · November 2017 - March 2023 [Guadalajara, Spain][Logistics]

- I participated in the installation of the IT infrastructure in what was, at that time, the largest facility in Europe, ensuring its proper functioning during the first five years of operation.
- I provided technical support to employees in the use of ERP systems, management software, and communication tools, troubleshooting issues and ensuring operational continuity.
- I trained employees to resolve recurring incidents, reducing support requests by 25%.
- This experience allowed me to better understand how users interact with applications, which helps me develop more intuitive and user-focused software.

FEATURED TECHNOLOGIES

Frontend	Backend	Tools	Learning
★ HTML	★ Java	★ Git	★ TypeScript
★ CSS	★ Hibernate	★ GitHub	★ Angular
★ Bootstrap 5	★ Spring Boot	★ Postman	★ Spring Security
★ Thymeleaf	★ Spring Data JPA	★ Docker	
	★ Junit 5		

EDUCATION

Higher Technician in Multiplatform Application Development

2025 - Brianda de Mendoza [Guadalajara, Spain]

I acquired a solid foundation in software development and explored various areas of the field, which provided me with a comprehensive perspective. This allows me to understand the interconnection of its different areas and approach projects with a strategic vision.

Higher Technician in Building Projects

2017 - Aguas Vivas [Guadalajara, Spain]

This training has given me a unique and valuable perspective on software development. Thanks to it, I have a better understanding of the needs and viewpoints of professionals from other sectors, which allows me to communicate more effectively and apply technological solutions more precisely. This skill is especially relevant in fields such as home automation and industrial solutions, where the integration of software with physical systems is essential.
